Studio Snapshot

Performance overview for April 2026.

- We're running below our median utilization for the first time in a while, which tells us more about the broader market than our specific performance
- Weekend mornings are surprisingly strong with three early slots outperforming baseline, suggesting our community is shifting toward earlier weekend routines
- The evening weekday slots are carrying us, with both 17:30 and 18:35 across different day patterns performing above seasonal expectations
- Nine instructors are seeing positive momentum compared to just three experiencing drops, which points to most of our teaching team connecting well with riders right now
- Only seven classes fell below 40% capacity out of 100 total, meaning our low performers are truly outliers rather than a pattern
